DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1-10 are rejected under 35 U.S.C. 102 (b) as being anticipated by Shinji (JP 2000203016).

With respect to claims 1, 3, 9 and 10, Shinji discloses an apparatus of a head drive control device for driving a head including a plurality of electrostatic actuators each including a diaphragm used also as or including a first electrode (fig.3: element 46) forming a wall surface of a discharge room (element 45) communicating with a nozzle (element 44) discharging a drop, and a second electrode (element 50) opposing the first electrode (46), the diaphragm being deformed by generating an electrostatic force between the first electrode and the second electrode, wherein the first electrodes of the electrostatic actuators are combined electrically, the head drive control device comprising: a part applying differently polarized potentials to the first electrode and the second electrode upon discharging said drop (abstract, [0030], [0031]).

With respect to claims 2 and 4, Shinji discloses part applies a positively polarized potential to the second electrode (50, [0031]).

With respect to claims 5 and 6, Shinji discloses that a maximum values of the differently polarized potentials applied to the first electrode and the second electrode have substantially equal absolute values (abstract).

With respect to claims 7 and 8, Shinji discloses waveforms of the differently polarized potentials applied to the first electrode and the second electrode are pulse waveforms (fig.8-10).
